EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

The first sentence of the specification as inserted in the amendment to the specification (see page 2 of the New Application Form filed August 5, 2003) has been amended to read as follows:

-- This is a continuation of application serial no. 09/431,803, filed November 1, 1999, now abandoned. --

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Upon further consideration, and the evidence submitted by applicants, the examiner cannot meet his burden of establishing that the claimed surface hydroxyl content is inherent to the prior art. The surface hydroxyl content will depend upon the thermal history of the support as well as the surface area, therefore, the examiner cannot establish that the surface hydroxyl content necessarily flows from the teachings of the prior art.

Art Unit: 1755

In other words, the prior art fails to disclose a catalyst made from a mixture containing a support having the claimed hydroxyl concentration, in combination with the other recitations of the claims.

It is noted that claims 77-132 are product-by-process claims which are not limited to the manipulation of the recited steps, only the structure implied by the steps. In the instant case, the surface hydroxyl concentration of the support will affect how the support interacts with the remainder of the components, and thus imparts structure to the final product.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David Sample whose telephone number is (571)272-1376. The examiner can normally be reached on Monday to Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jerry Lorengo can be reached on (572)272-1233. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
